Leader in Me school update notice
Habit 2 provides a good base for activities around goal setting. As a family (or with an individual child), choose an area that needs improvement. The area of improvement, or the broad goal, becomes your end in mind. Then think of specific steps that will lead to achieving this goal. For example, if the goal is to improve as a reader, specific steps may include reading a certain amount of time every day or working several times a week to improve oral fluency.

### SCIENCE FACT

While most people know that water boils at 100 °C (212 °F), this is at the normal conditions of sea level. The boiling point of water actually changes relative to the barometric pressure. For example, water boils at just 68 °C (154 °F) on the top of Mount Everest while water deep in the ocean near geothermal vents can remain in liquid form at temperatures much higher than 100 °C (212 °F).
